

WELCOME TO CAMPBELL'S SWEETS - WHOLESALE

NOW THAT YOU'RE APPROVED, LOGIN AT www.CampbellsSweets.com/Wholesale

1. Get Started

Once you're logged in using your new profile info (username/password), you'll be able to order a case of 25 or 50 bags of our REGULAR-SIZE bags, which are about 8 cups / half-gallon. Our own retail price for this size of bag is \$4.25. We do not dictate exact pricing to our wholesale customers.

Note: If you're shipping your order, we recommend ordering in cases of 50 to keep shipping costs more economical.

2. Select Your Bags

After choosing the case size, you can then assign a quantity of each flavor to the case. If you do not want a particular flavor, simply leave the quantity at "0". You can have as many of each flavor as you wish, but you will need to fill your case to the case-minimums of 25 or 50 bags.

3. Checkout

Upon finalizing your cases and flavor quantities, you can add the items to your cart and proceed to checkout. The checkout options are fairly standard; the portion to pay special attention-to is towards the end regarding pickup vs shipping and your payment method.

Choosing a local pickup is the free option, but bear in mind we do not have same-day order options (our standard lead time is about 3-5 business days for processing during our standard order volume, based on M-F weekdays). Pickup-times are limited to the hours of the location you choose for pickup.

4. Payment

The easiest method is to pre-pay using a credit/debit card, but you may also elect to issue an invoice, which subscribes to your pre-arranged payment method as discussed during your approval process (typically Net 15 days or a Pay-At-Pickup option).

Click "Place Order", and that's it!

You won't receive an automated-email notifying you we've gotten the order; rather, one of our staff will personally email you to confirm and notify you of any relevant details, usually within 24 business hours

WHOLESALE FREQUENTLY ASKED QUESTIONS

What is the shelf life for your bags?

All of our bags typically have a minimum of 4 weeks in staying fresh in room temperature environments, not exposed to prolonged heat, cold, or direct sunlight. The lighter the coating, the less the shelf life, so flavors like "Cheezy" typically stay fresh 4-6 weeks whereas our "Caramelcorn" has kept fresh for 8+ weeks.

What is the size of the bags?

Our Regular Size bags are all approximately 8 cups / half-gallon by volume. The weight changes based on the coating; lighter-flavors like "Beer Cheddar" or "Cheezy" are usually 3.5oz - 4oz, whereas heavier-coatings like "Caramelcorn" are typically 8oz.

Do you fresh-date the bags?

We have an internal system for tracking the production dates on bags, but do not default to placing "Best By" dates on the bags as some retail outlets have different systems for tracking shipments. If you wish to have "Best By" dates on your bags, please notify us when you place your order using the "Order Notes" during checkout.

Can I view my order history?

If you wish to view any order history or relevant information, click the "My Account" link at the top of the page, or hover-over the link to see sub-options. You can view several account details utilizing this function.

What could delay an order?

Weekends, legal holidays, treacherous weather and unexpected circumstances all could potentially delay order processing and shipment. Our busiest season(s) are typically over Easter & Christmas, so please allow for several additional processing days beyond the 3-5 standard business-days to ensure your order(s) arrive in a timely manner during holiday seasons.

Do you wholesale anything other than popcorn?

While our retail stores have cupcakes, chocolates and other items, our popcorn is the only product we're able to significantly discount and also ship year-round without worrying about shelf-life or damage from poor handling. Other items are available by special-order, but cannot be sold "Wholesale" in the same sense as our popcorn bags.
